BHARGAV KUMAR SAHA

Bengaluru, Karnataka, India bhargavsah2026@gmail.com linkedin.com/in/bhargavsah github.com/bhargav59

PROFESSIONAL SUMMARY

Motivated Cloud Engineer and AWS practitioner with hands-on experience designing, deploying, and automating cloud-native infrastructure at scale. Proven ability to architect serverless applications, build CI/CD workflows, manage secure multi-tier AWS environments, and optimise infrastructure for high availability and cost efficiency. Strong foundation in Linux, Python scripting, infrastructure-as-code principles, and networking. Passionate about building resilient, secure, and scalable cloud solutions that power modern applications.

TECHNICAL SKILLS

AWS Core Services: EC2, S3, VPC, RDS, DynamoDB, Lambda, API Gateway, ALB, EBS, IAM, CloudWatch, Elastic Beanstalk

Serverless & Compute: AWS Lambda, Amazon API Gateway, event-driven architecture, serverless application design

Networking & Security: VPC design, public/private subnets, Security Groups, NACLs, Load Balancers, IAM roles & policies, least-privilege access control

Infrastructure & Automation: Shell scripting (Bash), Python, Git, CI/CD fundamentals, Docker fundamentals, Ansible basics, infrastructure-as-code principles

Databases: MySQL, RDS, DynamoDB, automated backup & recovery, database security configuration

Operating Systems: Linux (Ubuntu, Amazon Linux, CentOS), Windows Server

Monitoring & Observability: AWS CloudWatch metrics, alarms, log-based diagnostics, system health monitoring, alerting pipelines

Core Competencies: Cloud architecture design, cost optimisation, technical documentation, troubleshooting, cross-team collaboration

EDUCATION

Bachelor of Engineering in Computer Science *2022-2026*
Visvesvaraya Technological University (VTU) Bengaluru, India

Relevant coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming, Distributed Systems

PROFESSIONAL TRAINING & EXPERIENCE

Cloud Engineering Intern *HEPro (AI Product Development – HEProAI / HEPro+)* *Nov 2025 – Jan 2026*
Great Leaders Institute Pvt Ltd. — D&B D-U-N-S: 955475091 — Remote, India

Designed and implemented a production-grade serverless web application architecture on AWS, using Lambda, API Gateway, S3, and CloudWatch to deliver a highly available, auto-scaling, and cost-efficient platform for HEProAI — a next-generation AI-driven mentoring product.

Developed event-driven backend logic in Python on AWS Lambda, integrated with RESTful APIs via Amazon API Gateway, enabling decoupled and scalable application workflows with zero server management overhead.

Configured Amazon S3 for cloud-based storage and application asset management, applying bucket policies and lifecycle rules for security and cost control.

Designed and enforced IAM roles and least-privilege security policies across all AWS services, ensuring robust access control and compliance with cloud security best practices.

Delivered a complete full-stack serverless application (HTML/CSS/JavaScript frontend + Python backend) end-to-end within a two-month internship, demonstrating strong ownership and independent cloud delivery capability.

Technologies: Python, AWS Lambda, Amazon API Gateway, Amazon S3, AWS IAM, AWS CloudWatch, REST APIs, HTML/CSS, JavaScript, Git

AWS APAC Solutions Architecture Virtual Experience *Forage* *November 2025*

Designed a scalable, fault-tolerant hosting architecture using AWS Elastic Beanstalk for a client experiencing rapid growth and performance degradation, applying cloud best practices for auto-scaling and high availability.

Produced comprehensive technical architecture documentation covering service selection rationale, scalability strategy, and detailed cost calculations, enabling clear stakeholder decision-making.

AWS Re/Start Program — On-the-Job Training *Magic Bus India Foundation* *May 2025 – July 2025*
210-hour intensive program, Bengaluru, India

Completed 210-hour structured training covering AWS core services (EC2, S3, VPC, RDS, IAM, DynamoDB, CloudWatch), gaining deep practical familiarity with cloud infrastructure provisioning and operations.

Developed Bash and Python automation scripts for AWS resource lifecycle management (EC2 provisioning, storage configuration, security group rules), reducing manual effort by 80%.

Built and validated end-to-end deployment workflows under guidance of AWS technical consultants, applying CI/CD fundamentals and infrastructure observability practices.

CLOUD INFRASTRUCTURE PROJECTS

- Architected a fully serverless task management application utilizing Amazon S3 for static frontend hosting and AWS Cognito for secure user authentication, completely eliminating server management overhead.
- Developed scalable, event-driven RESTful APIs using AWS Lambda and Amazon API Gateway to process backend CRUD operations.
- Engineered a highly performant NoSQL database schema in Amazon DynamoDB for rapid data retrieval and secured the infrastructure using AWS IAM least-privilege policies.

CERTIFICATIONS & CONTINUOUS LEARNING

GitHub Foundations — DataCamp (9 hours, August 2025)
Actively pursuing: AWS Certified Cloud Practitioner; AWS Certified Solutions Architect – Associate
Self-study: Terraform (infrastructure-as-code), Kubernetes fundamentals, Ansible automation, Docker containerisation

Exploring: AWS DevOps Engineer path, cloud cost optimisation strategies, multi-region architecture patterns

KEY STRENGTHS

AWS Hands-On	Deployed real serverless and multi-tier infrastructure on AWS
Automation-First	Built 10+ scripted cloud workflows reducing manual ops effort
Security-Minded	Consistently applies IAM least-privilege and defence-in-depth
Rapid Learner	Actively pursuing AWS certifications and IaC tooling (Terraform, K8s)
